

To whom it may concern

Chris Heath performed an invaluable service for us in our application as Approved Training Organisation (ATO), with the NZ Institute of Chartered Accountants (Institute). This involved him understanding our culture plus the corporate philosophy of the Institute, then providing a document which married the two cultures and allowed us to gain approved ATO status.

We found Chris helpful, and the amount of research that he completed in his own time made the whole process relatively painless for us.

We would have no hesitation in recommending Chris's services to any organisation that is looking to produce a document and simplify its services in the process.
